-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Drawings

1. The drawings are objected to because Figures 1-2, 'flexable' should be replaced with 'flexible'. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

2. The disclosure is objected to because of the following informalities:

Page 4, the brief description of the drawings should be brief and should not include reference numerals. Any pertinent information should be moved to the 'Detailed Description of

Art Unit: 1744

the Preferred Embodiment'. For instance, 'Fig. 1 is a vacuum hose arrangement of the present invention. Fig. 2 is the vacuum hose arrangement of Figure 1 with a water spray nozzle.'

Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Exemplary of such:

Claim 1, it is unclear as to where the preamble ends and the body of the claim begins.

Suggested claim language: A vacuum hose arrangement comprising: a vacuum hose having a bent, ridged rod mounted parallel to a flexible segment of the vacuum hose wherein the bent rod has a bend that is angled with respect to the center axis of the vacuum hose; a means to rotate the bent rod...'.

Line 1, it is unclear as to what is meant by 'ridged'. Is it supposed to be 'ridge'?

Line 4, 'the vacuum hose mount' lacks proper antecedent basis; where is it? What does it mount?

Line 5, 'the suction' should be replaced with 'a suction':

Line 5, '6' should be replaced with 'of'.

Art Unit: 1744

Claim 2, suggested claim language: 'The vacuum hose arrangement of claim 1, wherein the means to rotate includes a powered means to rotate the rod...'.

Claim 3, suggested claim language: 'The vacuum hose arrangement of claims 1 or 2 further comprising means for improving the vacuuming of earth...'.

Allowable Subject Matter

5. Claim 1 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

6. Claims 2-3 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

7. The following is a statement of reasons for the indication of allowable subject matter: The prior art discloses a vacuum hose arrangement with a rigid rod mounted parallel to a vacuum hose for movement of the suction end of the vacuum hose HOWEVER fails to disclose or fairly suggest a means to rotate the rod thus moving the suction end of the hose in a circular motion tracking parallel to the movement of the rod.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hanson et al., Hanson, Boomgaarden et al., Amphoux et al. and CH668611 disclose a vacuum hose with a rigid rod mounted thereto for movement of the suction end of the hose. Van Zante et al. and Buckner disclose a vacuum hose with a water nozzle attached thereto.
